

## DYSPEPSIA-PROOF.

How Any Meal Can Be Thoroughly Enjoyed by Any Stomach.

Costs You Nothing to Try Stuart's Dyspepsia Tablets.

Men, as a rule, are first discovered by their enemies. Their antagonists turn on the searchlight, and the proof of merit will lie in being able to stand the flash.

It was only in this way that Mr. White ever knew that dyspepsia was one of Mr. Black's worst enemies. Sitting face to face at a two-by-four table, he handed his afflicted friend the bill of fare:

Oyster Cocktail. Stuffed Olives. Boasted Ham Chowder. Strained Gumbo. Sirloin Steak with Mushrooms. Roast Beef Hash. Baked Ox Tongue with Sauerkraut. Lobster a la Newburg. Baked Pork and Beans. Combination Crab Salad. Hot Mince Pie. Pineapple Fritters.

Mr. White ordered a "little of each." Mr. Black ordered "crackers and a glass of milk." "I had such a big breakfast this morning," he said. "I'll just take a bite to keep you company." But Mr. White could not deceive the gleam in Mr. Black's eyes. He knew that Mr. Black was not a man to be deceived.

He said you have dyspepsia and be done with it! You'll always have that hungry look anyhow as long as you have dyspepsia. Now listen. My stomach was in just as bad condition as yours at one time. But now I can eat anything at any time. For instance, this clam chowder or sirloin steak or even the lobster would be just as welcome to my stomach as your crackers and milk. You don't realize how this dyspepsia business is robbing you of your spirit, of your energy and ability to think quickly. I can't help notice it. You haven't the cheer and sociability you had three months ago. Now I'll tell you what to do, and thereafter the cheerful Mr. White took a vial from his pocket and extracted a wee tablet.

"There, there is a tablet that contains an ingredient, one grain of which digests 1,000 grains of food. For even the worst dyspeptic it's the only thing that really gives relief. The reason is it relieves the stomach of nearly all the work it has to do, digests everything in the stomach and stimulates the gastric juice. I can't get along without them. They are Stuart's Dyspepsia Tablets. You can get them anywhere on earth for 50c a package."

Yes, it is true, Stuart's Dyspepsia Tablets absolutely stop heartburn, nausea, indigestion, dyspepsia of the worst type, sour stomach, bloated feeling and all eruptions and irritation, and freshen and invigorate the stomach. They cheer you up, and make you get all the good there is in your food. You will forget you ever had a stomach to worry you.

Send us your name and address today and we will at once send you by mail a sample package free. Address: F. A. Stuart Co., 150 Stuart Bldg., Marshall, Mich.

## EAST MISSOURI'S PAVING FINISHED

Work on West Portion of Street Will Now Be Commenced.

The paving of East Missouri street was finished Friday and all efforts will now be directed toward paving West Missouri street. The work on the latter job was started on Gladstone street and will be pushed eastward toward West Missouri street and to Oregon. One block of paving on Gladstone street has been completed and the foundation laid for another block.

Pending the arrival of special steel for the turn south on Oregon street from West Missouri, the street car company is delaying the completion of its track. The shipment of material has been expected for several days. All the balance of the steel for the Missouri street line has been laid and a majority of the trolley poles planted. The trolley wire has not yet been stretched.

The Texas Bitulithic company is paving the warehouse store yard of the Krakauer, Zork & Mays establishment and expects to complete the work within a few days.

**HAVANA FLIGHT POSTPONED.** Key West, Fla., Jan. 27.—Aviator McCurdy today postponed his attempt to fly from here to Havana. The wind was too high and the sea too rough.

**Alleged Truant Caught.** Frank Rivers of 517 Newton street, who, it is said, ran away from home two days ago, was arrested by the police Thursday.

## BLOOD TROUBLES CONSTITUTIONAL INFECTION

Constitutional Blood Poison is the most insidious of all diseases. It begins in an insignificant manner, usually the appearance of a tiny sore being the only outward evidence of its presence. But down in the blood the treacherous infection is at work, and in a short time its chain of symptoms begin to crop out. The mouth and throat ulcerate, skin eruptions break out, sores and ulcers appear on the body, the glands in the groin swell, and sometimes the hair comes out. Mineral medicines cannot cure Constitutional Blood Poison; they only shut the disease up in the system to smoulder and await an opportunity of breaking out afresh. The only possible way to cure the disease is to REMOVE the germs from the blood. S. S. S. goes into the blood, and while removing the infection makes the blood pure, fresh and healthy. This causes a general upbuilding of the entire system, and when S. S. S. has made a cure there is no return of the hideous symptoms. S. S. S. is made entirely of vegetable matter, containing not the least particle of mineral in any form. It is a perfectly safe medicine and a certain cure for blood poison. We have a Home treatment book which we will be glad to send free to all who write and request it, also any medical advice without charge.

## ELY TALKS DUMPING AND URGES ITS ADVANTAGES

Annual Meeting of Chamber of Commerce Is Held and Reports Read.

It was left for a man from Deming, N. M., to come over to El Paso and tell El Pasoans what they need to develop the valley and mesa lands. He is Ralph C. Ely. Mr. Ely is neither a pump agent nor a pump manufacturer. His hobby is pumps. He thinks in acre feet, talks in gallons and dreams of level plains as thickly studded with pumps as one of Gifford Pinchot's forests and with all the pumps working overtime.

**Says Things and Proves Them.**

Thursday Mr. Ely packed his handbag and loaded up on Pump statistics and came to El Paso. He gave the members of the chamber of commerce the benefit of his experience and study at the annual meeting Thursday evening. There were a few practical ranchers at the meeting, but Mr. Ely was undaunted and talked pumps and pumping as fast as a dog can run and talked sense all the time. He said that pumping irrigation was as far ahead of gravity irrigation as gravity irrigation is ahead of rainfall. Then he set about proving it and made a very good case for the pumping method. He told of alfalfa that had been grown near Deming with two acre feet of water, the result being five cuttings and each cutting averaging two and one-half tons to the acre. He told of an old man three miles from Deming who put in 35 acres of alfalfa which was irrigated by means of pumps. His crop amounted to 1500 pounds of alfalfa to the acre, which sold for \$6.25 per 100 pounds, and gave him a gross profit of \$75 an acre and made more the first year than his pump, land, clearing and fence cost.

**Not a Knock, But An Argument.**

Then the speaker started to compare the pumping system to the gravity system, using the Elephant Butte dam for his gravity system comparison. It was not a knock, but he figured what it would cost less for operating a system of pumping plants than it would to operate the Elephant Butte dam. His address was not an attack on the gravity irrigation system, but an appeal to the farmers who owned bench land to put it under cultivation and thereby add to the wealth of the community. An impervious subsoil conserves the water on the bench land when it soaks to the ground in the valleys, he said. One gallon of water on the bench land will do the work of two on valley land, he said. "Put in big plants," he said. "Plants that will pump 100 gallons a minute. Don't wait for the Elephant Butte dam to be completed, but put in pumping plants now and begin irrigating. The pumping plant is an insurance against any failure of water which will more than pay for itself with the first crop that is saved. Put in pumping plants for fruits which will more than justify the cost. A central power plant is the solution of the problem of the pump trouble. We are extending our light plant to use the peak of the load after the lights are put when the power can be sold at a minimum cost. Put in pumping plants for your bench land and for your valley land. Pumping is the salvation of the southwest."

**Prof. Ely, of the A. & M. college at Mesilla Park, N. M., also read a paper on pumping for irrigation.**

**President's Report Read.**

The annual report of the retiring president of the chamber of commerce was read. The work of the association was reviewed for the year and the work done by the various committees of the chamber were outlined in detail. The report of the financial condition of the organization showed that a balance of \$1948.37 remained after an expenditure of \$19,575.15. The importance of having a larger advertising appropriation was shown in the president's report, which showed that but \$2000 had been expended for advertising during the year, compared to some ranging from \$12,000 to \$75,000 which was being spent by other cities in advertising their resources. Two other speakers referred to this.

**W. E. Anderson, a member of the retiring board, advocated a small voluntary assessment on land per acre in the valley for the purpose of advertising the valley's resources. Mr. Ely showed how much more Deming was doing than El Paso in proportion to the size of the two towns. Deming, he said, was spending \$6000 for boosting, with a population of but 1900. El Paso was spending \$120,000, instead of \$20,000, he said. The report of the year's work was received with applause by the members present, and upon motion of Claiborne Adams was accepted and filed.**

**C. R. Troxel and H. A. Everest, of Oklahoma City, spoke briefly on the importance of getting a better mining law for West Texas, and W. J. Sawyer told of a new Denver pump which was to be given a test in El Paso soon. John S. Mathison, of San Francisco, also spoke in favor of San Francisco for the Panama exposition.**

A number of musical numbers were given by Parvin Witte, Francis Moore and the El Paso quartet. A Mexican orchestra also played during the intermission.

**COURT DEDUCTS MONEY FROM DAMAGE VERDICT.**

In modifying and then affirming the case of the Atchison, Topeka & Santa Fe Railway company vs. A. J. Clossin, on appeal from El Paso, in which Clossin recovered a judgment for \$2500 for personal injuries, the fourth court of civil appeals calls attention to the fact that inasmuch as the plaintiff had received \$215 from the El Paso & Southern railway as a sort of gratification, this amount should be deducted from the \$2500. The judgment is thus modified to the figure of \$2285. Clossin was an inspector of cars and while noting that that capacity was injured. He sued the Santa Fe and the El Paso & Southern, and also the El Paso & Northeastern. The latter two roads gave him \$215 and he signed a quit claim against them. On the trial of the case the Santa Fe alleged that it was included in the release, but the lower court held that such was not the case. The higher court upholds this view, but takes the stand that Clossin ought to remit the \$215 already received.

**Dr. John Laughlin, of Linton, Ind., is in the city visiting Mr. and Mrs. W. M. Laughlin, on West Missouri street.**

## General Grant's Daughter a Princess

Princess Cantacuzene, formerly Miss Julia Dent Grant, daughter of Gen. Frederick Dent Grant, and her eldest son. This photograph was snapped as the princess was about to sail for her home in St. Petersburg, after a two months' visit to her native land. The prince accompanied his wife and on his arrival in Russia he will take up his duties as aide to the grand duke Nicholas.

## FAMOUS HORSE IS TAKEN BY COUPLE THOROUGHLY ALIVE

Man and Woman Held for Stealing Farmington Boy—Captured by Indians.

**Farmington, N. M., Jan. 27.**—Much local excitement followed the stealing of Farmington Boy, a thoroughbred trotting stallion owned by George K. Griffin. The pursuit of the thieves, who proved to be a man and a woman, and their capture and the return of the horse, was an exciting chapter of the incident this week.

The horse, which was raised by Mr. Griffin, has shown some fast traits on tracks in different parts of Colorado and New Mexico. The past few years he has been used only as a driving horse and is the admiration of all the horsemen in this section of the country. Mr. Griffin drove in from his fruit ranch and tied the horse to a hitching post in front of his residence in the business part of town. He was gone less than 20 minutes when he returned and found the horse had disappeared. A rain which lasted only a few minutes washed out the tracks so no sign was left to show the course taken. After making a thorough search the trail was found. The buggy was an old rubber tired one, the rubber tires had worn off and one wheel had a flat tire, so the track was a peculiar one and when found was easily followed.

It headed down the San Juan river, and superintendent Shelton, who is in charge of the Navajo agency at Shiprock, was notified and a small posse started out from Farmington. Navajo Indian policemen picked up the trail only a short distance from the Shiprock agency, which is 25 miles west from Farmington. After following the track for about 30 miles they overtook the thieves, who proved to be a man and woman who came to Farmington a few days ago and took room in a local rooming house as if intending to locate permanently. They are young people, the man being about 27 and the woman about 23. They surrendered themselves to the Indians who took them to the Shiprock agency, where they were put in jail. The place where the arrest was made is in Colorado, but the Indians know nothing about the technicalities of the law and so brought the prisoners back across the line without the trouble of applying to the governor of Colorado for a requisition.

## SELLS 50 CARS OF BALED BEAR GRASS

Midland Votes to Re-Incorporate—Well Proves a Costly Failure.

**Midland, Texas, Jan. 27.**—H. M. Horton, who ranches a few miles south-east of Midland, has made a contract in St. Louis to deliver at various stations along the St. & P. railroad 50 carloads of bear grass. The grass is to be gathered, dried and baled in 100 pound bales. The baled bear grass brings \$12 a ton here ready for shipment.

This grass is found in abundance all over the south plains country, and so far has been considered worthless. Horton says it is now wanted for the strong fiber it contains. Owners of land on which the grass grows wild expect to realize from \$1 to \$2 per acre for the land by reason of this new enterprise.

**E. H. Leache, of Philadelphia, Pa., is here to spend several months purchasing and training polo ponies to take north with him in the spring.**

**G. Ingle today completed his contract with Henry M. Half, of this city, by reaching a depth of 2000 feet in a well at Upland, Upton county, Texas, which he has been drilling for oil, gas or artesian water. While he reports several strong streams of water in the first 600 feet, after that he found nothing of value. The last 500 feet was in solid rock salt. Mr. Ingle's contract called for \$5 a foot. Mr. Half was to furnish the casing and to freight the fuel for drilling from Midland to Upland. The well cost him as it stands approximately \$20,000.**

An election was held here to determine whether Midland should reincorporate. It resulted in a very large majority vote for incorporating. The new city will embrace four full sections, including nearly all of the plot additions to the town, and will take in many handsome homes and improved places situated heretofore just beyond the corporate limits.

An election will be held as soon as possible for city officers and all city ordinances will be reenacted.

A daily short story every day in The Herald; also the serial.

## TULAROSA OLD BUT THOROUGHLY ALIVE

Is in a Rich Agricultural Section With Plenty of Water.

**Tularosa, N. M., Jan. 27.**—Tularosa is situated about 90 miles north of El Paso on the E. P. & S. W. railroad, in a valley close to the edge of the Sacramento mountains, and is watered by the Tularosa creek. The town has about 1300 inhabitants.

It is a very old town, about 60 years old, and was made famous in early history by battles between the Mexicans, who lived here at that time, and had taken up government land, and the Indians, who thought they were usurping their rights, and here today are to be found some of the same adobe houses, forts and the walls used for protection, and all are a daily reminder of old Geronimo and his fighting bands.

**Good Farming Country.** The surrounding country is fine for farming, with plenty of water. Water from the canyons irrigates a lot of land and one can get water at from 30 feet to deeper and can get a never failing supply. The place has proved what it can do in an agricultural way, and is said to be the only self-sustaining town in New Mexico, and also one of the best irrigated.

The inhabitants used to be mostly Mexicans, but in the last 10 years a great many Americans have come here, and now we have more Americans than Mexicans, and with their help this will be a town with a big future soon.

**Is a Good Business Point.**

Tularosa is a good business center, thousands of dollars worth of business being done every year in alfalfa alone, besides the immense vineyards which yield thousands of pounds of grapes yearly, especially of the Mission variety, from which the natives make barrels of wine. All kinds of grapes do well here. All kinds of fruit are grown, such as apples, pears, quinces, peaches, nectarines, figs, etc. In climate Tularosa cannot be beat, especially for those afflicted with pulmonary and kidney trouble. The fine air and almost perpetual sunshine, mild weather permitting one to sleep out doors winter and summer without any inconvenience, will cure almost any pulmonary trouble, if they come here in time. Several pronounced incurable by the doctors, today are living and enjoying the fine country that helped to effect their cure. The water here has cured several supposedly "incurable" cases of kidney trouble.

**Scenic Beauty.** The scenic beauty is superb around Tularosa. The Sacramento mountains are on the east, Sierra Blanca, rising to an altitude of 12,000 feet, and covered with a white mantle almost the entire year, is 40 miles from Tularosa. In the streams in the mountains one can fish for speckled trout, which abound. To the west is the San Andres, looming up a little farther away, yet with the two ranges of mountains, one would think they came together at the north. The sunset and sunrise viewed from these mountain ranges will rival the famous sunsets on Pike's Peak.

One may think it very warm here in summer, but you can with all comfort sleep under blankets, for the breezes that are wafted from the mountains are refreshing and cool. Children here are going barefooted, and have all winter, with the exception of about a week in January, and apples are left on the ground piled in mounds and only covered with a canvas or any other light covering one may wish to use.

**Chicken Raising Profitable.** One ranch here is said to be one of the largest in the United States. It raises White Leghorn chickens and the eggs are set with the hens at the rate of 15 to 20 cents per dozen. On this ranch 4000 little chicks are hatched every three weeks through the hatching season, and there are 7000 laying hens all the time. The owner of the ranch has now three miles of sweet peas and six acres of carnations, Parma violets and peonies.

Tularosa has a new bank, recently organized, eight general merchandise stores, one drug store, one hotel, two meat markets, one newspaper, two restaurants, one blacksmith, three school houses, one Union church, Catholic church, one bakery and one furniture store, and a good opening for a good up-to-date hardware store.

Close to Tularosa is the White Sand. One man is experimenting with it and has made several houses of it, jolts, rafters and back. Fancy jars, umbrella stands and jardiner stands can be made out of it, although it has to go through a process of cooking before these things can be made. It is snowy

## INFLAMMATION AND PAIN

Cured by Lydia E. Pinkham's Vegetable Compound.

**Creston, Iowa.**—"I was troubled for a long time with inflammation, pains in my side, sick headaches and nervousness. I had taken so many medicines that I was discouraged and thought I would never get well. A friend told me of Lydia E. Pinkham's Vegetable Compound and it restored me to health. I have no more pain, my nerves are stronger and I can do my own work. Lydia E. Pinkham's Vegetable Compound cured me after everything else had failed, and I recommend it to other suffering women."

—Mrs. W. M. SEALS, 605 W. Howard St., Creston, Iowa.

Thousands of unsolicited and genuine testimonials like the above prove the efficiency of Lydia E. Pinkham's Vegetable Compound, which is made exclusively from roots and herbs.

Women who suffer from these distressing ills should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you want special advice write to Mrs. Pinkham, at Lynn, Mass. She will treat your letter as strictly confidential. For 20 years she has been helping sick women in this way, free of charge. Don't hesitate—write at once.

white and a great many use it for plastering and get a white coat on their walls. It is very fine and can be chewed up like gum. It will be very valuable when its true worth is found.

**OKLAHOMA FARMER KILLS A SHERIFF**

Officer Mistaken for Horse Thief When He Goes to Man's Barn.

**Guyton, Okla., Jan. 27.**—Sheriff R. E. Martin, of Hanford county, was shot and killed while trying to arrest a man named Fifer, who held an alleged unlawful claim 20 miles north-west of Hanford, late last night. He was shot by Fifer while entering his barn with a deputy United States marshal. The sheriff struck a match and it is probable that Fifer suspected horse thieves when he saw Martin and the deputy marshal entering the barn after dark.
